PROFESSIONAL SUMMARY

Front-End Engineer and Shopify Specialist with 4 years of experience building high-converting, mobile-first web storefronts across Shopify, WordPress, and custom web applications. Deep expertise in **Shopify 2.0, Liquid, JavaScript (ES6+), TypeScript, React, and GraphQL/REST APIs**. Proven record building CLI automation tools on the Shopify Admin API (**3,500+ products and 7,300+ variants**), streamlining catalog workflows, and driving site performance gains (**+47% Lighthouse score boost, 38 to 56**). Specialized in bridging complex backend data with accessible, high-performing user interfaces.

CORE COMPETENCIES

- Shopify 2.0 & Liquid Theme Architecture
- Front-End Engineering (JavaScript ES6+, TypeScript, React)
- Shopify Admin & Storefront APIs (GraphQL & REST)
- Core Web Vitals & Performance Optimization (+47% Lighthouse)
- Conversion Rate Optimization (CRO) & Mobile-First UX
- Custom Cart Logic, Bundling & Dynamic Buy-Boxes
- Automation & Webhooks (Node.js, Express, Puppeteer, HubSpot)

WORK EXPERIENCE

Exologic

December 2024 - Present

Web Developer (Contractor)

Remote

- Delivered responsive web apps, custom extensions, and websites as an independent contractor, managing concurrent client deliverables.
- Developed **Focusspace**, a Chrome productivity extension for task management and focus workflows using clean JavaScript and browser APIs.
- Engineered an installable cross-platform **PWA (Progressive Web App)** for vCard (VCF) contact management and developed responsive application UIs for Deliverate and Localchat.

A-TeamWork

August 2025 - October 2026

Web Developer & Shopify Specialist

Remote

- Maintained, optimized, and managed multiple client websites built on Shopify and WordPress, taking ownership of site health, responsiveness, and updates.
- Engineered a custom Node.js and GraphQL CLI automation suite leveraging the Shopify Admin API for mass normalization and synchronization of **3,500+ products and 7,300+ variants** with traceability logs.
- Raised Lighthouse mobile performance score by **47%** on a legacy theme (**38 to 56**) through image compression, script optimization, layout rendering fixes, and reduction of Cumulative Layout Shift (**CLS**).
- Conducted deep UX and performance audits using Lighthouse and PageSpeed Insights, implementing technical fixes that improved user retention and conversion rates (**CRO**).

MBtek

August 2024 - February 2026

Full-Stack Web Developer

Remote

- Developed and maintained Shopify e-commerce sites with advanced Liquid theme customization (**Shopify 2.0**).
- Engineered **System Builder**, a complex logic-based questionnaire tool that automated product selection and bundling for HVAC systems, directly driving conversion growth.
- Automated warranty certificate generation triggered by webhooks through a custom Node.js/Express API, Puppeteer PDF rendering, and HubSpot CRM integration.

- Created a custom **Frequently Bought Together** snippet using JavaScript that dynamically recommended and bundled complementary products in cart to boost Average Order Value (**AOV**).

Top Of The Line VA

June 2023 - July 2024

Web Developer & WordPress Specialist

Remote

- Contributed to full-stack development of plugins and themes for the ProspectorWeb lead generation platform using **PHP, TypeScript, HTMX, and Alpine.js**.
- Designed high-converting landing pages and event funnels for clients using WordPress, page builders (**Divi, Elementor**), and custom code.

Seguros Catatumbo

June 2022 - December 2022

Systems Analyst / Analyst II

Venezuela

- Led the redesign and restructuring of the corporate Intranet on WordPress to streamline internal organizational communication and employee access to resources.

FEATURED PROJECTS

FocusSpace & Chrome Extension

React & Plasmo

Privacy-first Chrome extension and companion web application for deep work. Includes Pomodoro focus sessions, distraction tab cleanup, and real-time alerts.

React, TypeScript, Tailwind CSS, Chrome Extensions API

Shopify Mass Data CLI Automation Suite

A-TeamWork

Node.js and GraphQL CLI app on the Shopify Admin API that cleans, normalizes, and synchronizes 3,500+ products and 7,300+ variants with traceability logs.

Node.js, GraphQL, Shopify Admin API

HVAC System Builder & Product Bundler

MBtek

Logic-based Shopify questionnaire that automatically selects and adds required HVAC products to cart based on user inputs, directly driving conversion.

Shopify 2.0, Liquid, JavaScript (ES6+)

EDUCATION

Bachelor's Degree in Electronics Engineering: Automation & Control Universidad Rafael Belloso Chacín (URBE) 2015 - 2019

CERTIFICATIONS

EF SET English Certificate (C1 Reading, C1 Writing, B2 Listening, B1 Speaking)	EF Standard English Test	cert.efset.org/HUaE2W
